Apricot Utilization, Price, and Value by Utilization – States and United States: 2013-2015 .....	28
Apricot Processed Selected Utilization and Price by Use – California: 2013-2015 .....	29
Apricot Unutilized Production – States and United States: 2013-2015 .....	29
Avocados Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2014, 2014-2015, and 2015-2016 .....	30
Avocados Utilization, Price, and Value by Utilization – States and United States: 2013-2014, 2014-2015, and 2015-2016 .....	31
Avocados Unutilized Production – States and United States: 2013-2014, 2014-2015, and 2015-2016 .....	31
Banana Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2015 .....	32

Banana Utilization, Price, and Value by Utilization – States and United States: 2013-2015 .....	32
Banana Unutilized Production – States and United States: 2013-2015 .....	32
Cultivated Blackberry Area Harvested, Yield, Production, Price, and Value – States and United States: 2013-2015 .....	33
Cultivated Blackberry Utilization, Price, and Value by Utilization – States and United States: 2013-2015 .....	34
Cultivated Blackberry Unutilized Production – States and United States: 2013-2015 .....	34
Cultivated Blueberry Area Harvested, Yield, Production, Price, and Value – States and United States: 2013-2015 .....	35
Cultivated Blueberry Utilized Production by Utilization – States and United States: 2013-2015.....	36
Cultivated Blueberry Price, and Value by Utilization – States and United States: 2013-2015.....	37
Cultivated Blueberry Unutilized Production – States and United States: 2013-2015 .....	37
Wild Blueberry Area Harvested, Yield, Production, Price, and Value – States and United States: 2013-2015 .....	38
Wild Blueberry Utilization, Price, and Value by Utilization – States and United States: 2013-2015 .....	38
Wild Blueberry Unutilized Production – States and United States: 2013-2015.....	38
Boysenberry Area Harvested, Yield, Production, Price, and Value – States and United States: 2013-2015.....	39
Boysenberry Utilization, Price, and Value by Utilization – States and United States: 2013-2015.....	39
Boysenberry Unutilized Production – States and United States: 2013-2015 .....	39
Sweet Cherry Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2015 .....	40
Sweet Cherry Utilization, Price, and Value by Utilization – States and United States: 2013-2015 .....	41
Sweet Cherry Processed Selected Utilization and Price by Use – States and United States: 2013-2015 .....	42
Sweet Cherry Unutilized Production by Crop – States and United States: 2013-2015.....	42
Tart Cherry Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2015 .....	43
Tart Cherry Utilization, Price, and Value by Utilization – States and United States: 2013-2015.....	44
Tart Cherry Processed Selected Utilization and Price by Use – States and United States: 2013-2015 .....	45
Tart Cherry Unutilized Production by Crop – States and United States: 2013-2015.....	45
Coffee Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2014, 2014-2015, and 2015-2016 .....	46
Coffee Utilized Production and Price on Equivalent Basis – Hawaii: 2013-2014, 2014-2015, and 2015-2016.....	46
Coffee Unutilized Production – States and United States: 2013-2014, 2014-2015, and 2015-2016 .....	46

Cranberry Area Harvested, Yield, Production, Price, and Value – States and United States: 2013-2015.....	47
Cranberry Utilization, Price, and Value by Utilization – States and United States: 2013-2015.....	48
Cranberry Unutilized Production – States and United States: 2013-2015 .....	48
Dates Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2015.....	49
Dates Utilization, Price, and Value by Utilization – States and United States: 2013-2015 .....	49
Date Unutilized Production – States and United States: 2013-2015.....	49
Fig Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2015.....	50
Fig Utilization, Price, and Value by Utilization – States and United States: 2013-2015.....	50
Figs Processed Selected Utilization and Price by Use – California: 2013-2015.....	51
Fig Unutilized Production – States and United States: 2013-2015.....	51
Grape Bearing Acreage, Yield, Production, Price, and Value – States and United States: 2013-2015 .....	52
Grape Fresh and Processed Utilization, Price, and Value – States and United States: 2013-2015.....	54
Grape Processed Selected Utilization and Price by Use – States and United States: 2013-2015 .....	56
Grape Processed Utilization by Selected Variety – States and United States: 2013-2015 .....	57
Grape Unutilized Production – States and United States: 2013-2015 .....	57
Concord Grapes for Processing Marketing Year Average Prices – New York and Pennsylvania: 2013-2015 .....	58
Grapes for Fresh Use Monthly Average Prices Received – United States: May 2013 - December 2015 .....	58

## Noncitrus Fruit Highlights

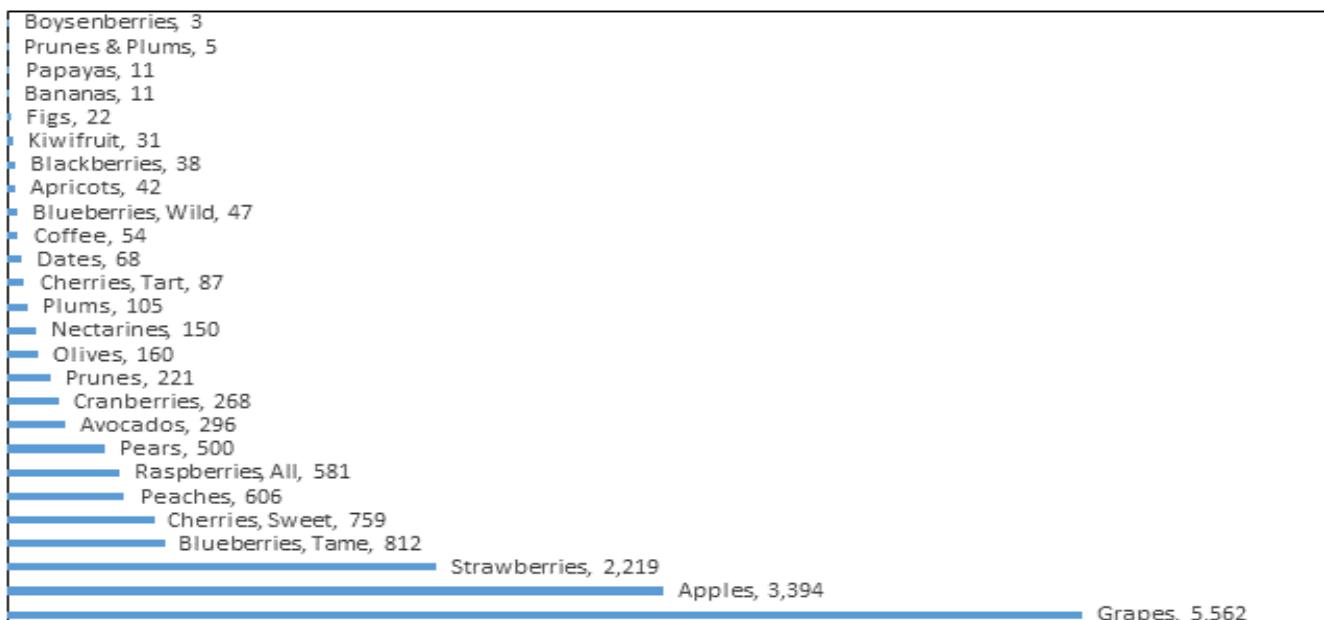

In 2015, the Nation's utilized production of the leading noncitrus fruit crops totaled 18.4 million tons, down 4 percent from 2014. Fresh utilized production for 2015 noncitrus fruit crops totaled 7.68 million tons, down 7 percent from the previous year. Processed utilized production totaled 10.7 million tons, down 2 percent from 2014.

The value of utilized production for 2015 noncitrus fruit crops totaled 16.1 billion dollars, down 2 percent from the previous year. Bearing acreage for major deciduous fruit crops totaled 1.71 million, down 1 percent from 2014. Bearing acreage for miscellaneous noncitrus fruits totaled 364,030, up 1 percent from 2014. Bearing acreage for nuts totaled 1.47 million acres, up 3 percent from the previous year.

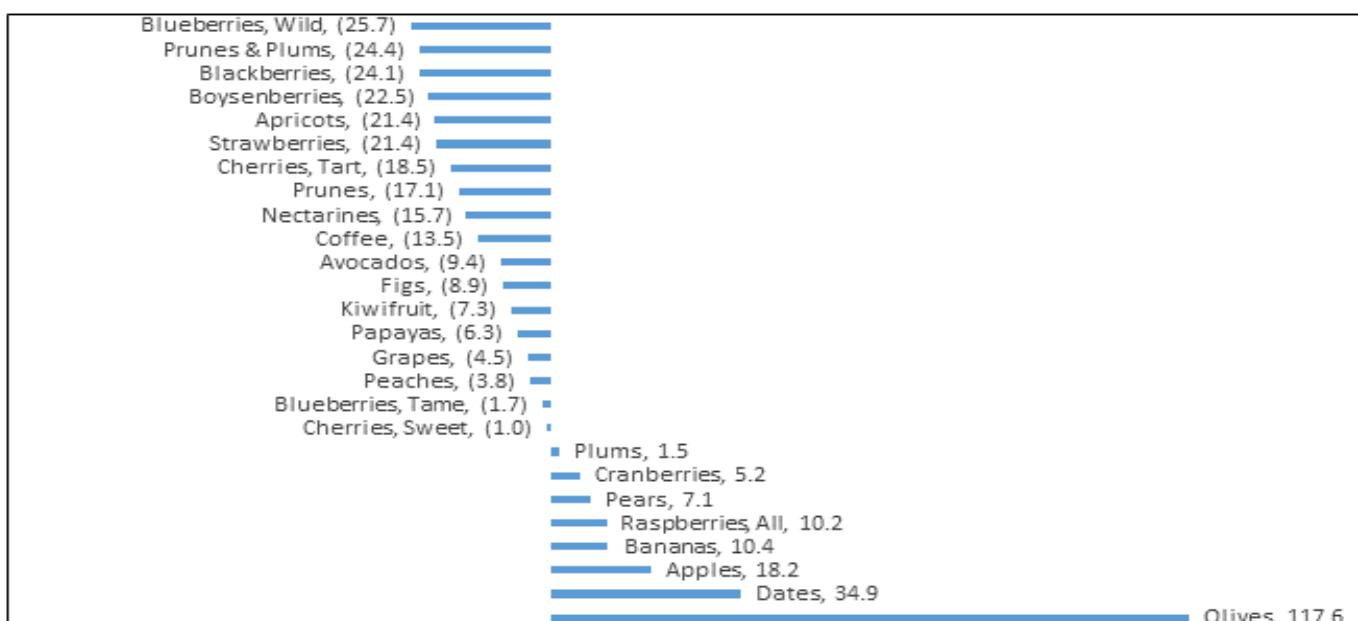

### Noncitrus Fruits Value of Utilized Production

#### United States: 2015

Million dollars

## Noncitrus Fruits Value of Utilized Production United States: 2015 Percent Change From 2014

(NA) Not available.

(X) Not applicable.

<sup>1</sup> Harvested acreage. Yield based on utilized production.

<sup>2</sup> Estimates discontinued in 2015.

<sup>3</sup> Idaho, Michigan, Oregon, and Washington.

<sup>4</sup> 2014 estimates include all program States: California, Oregon, and Washington. Prior estimates were for Oregon only.

<sup>5</sup> 2014 estimates include all program States: California, Oregon, and Washington. Prior estimates were for Oregon and Washington only.

<sup>6</sup> Yield based on in-shell equivalent. Shelling ratios are: 2013 - 0.580; 2014 - 0.604; 2015 - 0.583.

<sup>7</sup> Production is rounded to the nearest 1,000 barrels prior to converting to tons fresh equivalent.

<sup>8</sup> Price and value are based on the edible portion of the crop only.

### Fruits and Nuts Bearing Acreage – United States: 2013-2015

Year	Citrus Fruits <sup>1</sup>	Major Deciduous Fruits <sup>2</sup>	Miscellaneous Noncitrus <sup>3</sup>	Nuts <sup>4</sup>	Total
	(acres)	(acres)	(acres)	(acres)	(acres)
2013 .....	791,200	1,749,580	339,350	1,379,000	4,259,130
2014 .....	777,700	1,733,790	361,555	1,427,000	4,300,045
2015 .....	764,900	1,712,230	364,030	1,469,000	4,310,160

<sup>1</sup> Grapefruit, lemons, oranges, tangelos, and tangerines.

<sup>2</sup> Commercial apples, apricots, cherries, grapes, nectarines, peaches, pears, plums, and prunes.

<sup>3</sup> Avocados, bananas, berries, coffee, cranberries, dates, figs, guavas, kiwifruit, olives, papayas, and strawberries.

<sup>4</sup> Almonds, hazelnuts, macadamia nuts, pistachios, and walnuts.

### Noncitrus Fruits Utilized Production by Type of Utilization – United States: 2013-2015

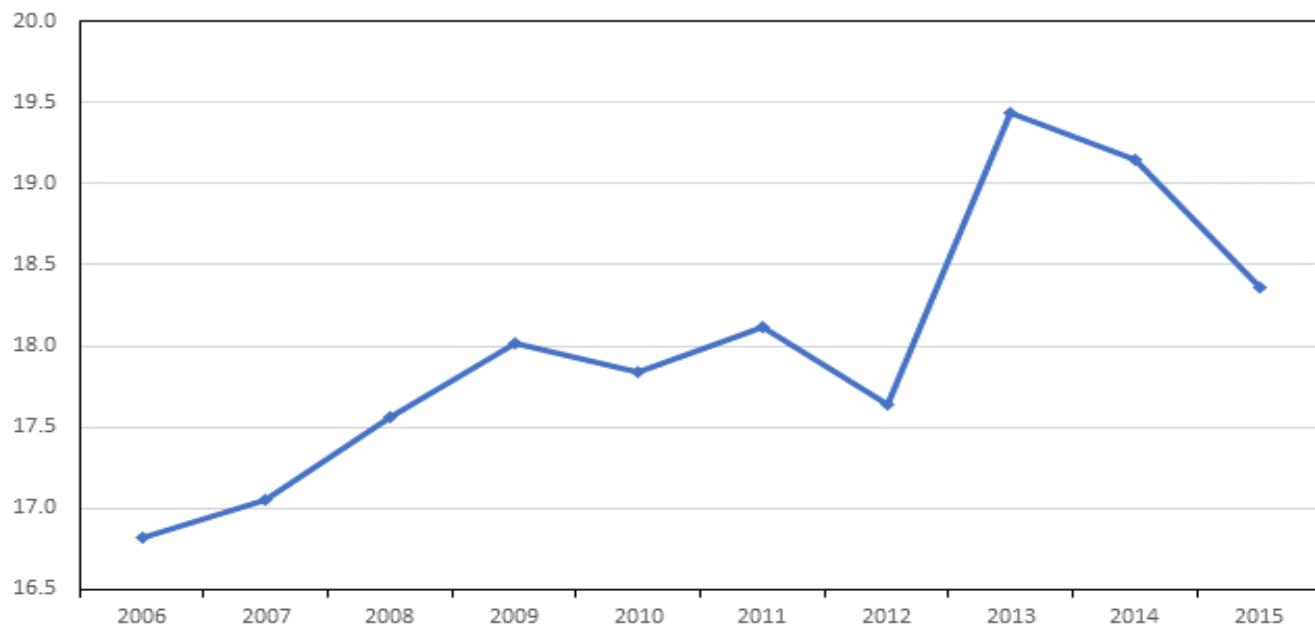

Year	Utilized Production	Fresh	Processed <sup>1</sup>					
			Canned	Dried	Juice	Frozen	Wine	Other
	(1,000 tons)	(1,000 tons)	(1,000 tons)	(1,000 tons)	(1,000 tons)	(1,000 tons)	(1,000 tons)	(1,000 tons)

<sup>1</sup> Yield is based on utilized production.

## Crop Comments

**Almonds:** Almond utilized production, at 1.63 million tons, was up 5 percent from 2014. Bearing acreage for almonds continued to increase, totaling 890,000 acres in 2015. Yield, at 2,140 pounds per acre, was down 10 pounds from 2014. The 2015 utilized almond crop was valued at 5.33 billion dollars, 28 percent less than the previous year. The price per pound of almonds, at \$2.84, declined 29 percent from 2014.

**Apples:** Total apple production for 2015 is estimated at 10.0 billion pounds, down 15 percent from 2014. Bearing acreage totaled 315,880, down 2,300 acres from the previous season. Total yield for the 2015 crop was down 15 percent to 31,700 pounds per acre. The all price for the 2015 crop, at 34.2 cents per pound, was up 8.5 cents per pound from the previous season. United States total value for the 2015 season total \$3.39 billion dollars, up 18 percent from the 2014 season.

**Apricots:** Total apricot production for 2015 is estimated at 41,657 tons, down 36 percent from 2014. Bearing acreage totaled 9,620, down 1,200 acres from the previous season. Total yield for the 2015 crop was down 28 percent to 4.33 tons per acre. The all price for the 2015 crop, at 1,010 dollars per ton, was up 23 percent from the previous season. United States total value for the 2015 season totaled 41.7 million dollars, down 21 percent from the 2014 season.

**Avocados:** Utilized production for 2015-2016 is estimated at 223,960 tons, up 29 percent from the previous year. The California crop, accounting for 88 percent of the United States utilized production, is up 40 percent from 2014-2015. Acreage in the United States is up slightly from the previous season to 59,280. The value of the 2015-2016 crop is down from the 2014-2015 crop year in all States while the price is down in California and Hawaii.

**Bananas:** Hawaii's total production for 2015, at 12.0 million pounds, was up slightly from 2014. Bearing acreage totaled 830, down 30 acres from the previous season. Total yield for the 2015 crop was up 4 percent to 14,500 pounds per acre. The all price for the 2015 crop, at 91.3 cents per pound, was up 9.3 cents per pound from the previous season. Hawaii total value for the 2015 season totaled 10.9 million dollars, up 10 percent from the 2014 season.

**Blackberries:** Total 2015 United States blackberry production is estimated at 51.3 million pounds, up 13 percent from 2014. Harvested acreage totaled 6,920 acres, up 820 acres from the previous season. The average yield, at 7,360 pounds per acre was down slightly from the previous year.

**Cultivated blueberries:** Total 2015 United States cultivated blueberry production is estimated at 560 million pounds, down 3 percent from 2014. Harvested acreage totaled 89,820, up 6 percent from the previous season. The average yield, at 6,160 pounds per acre was down 8 percent from the previous year.

**Wild blueberries:** Total 2015 United States wild blueberry production is estimated at 101 million pounds, down 3 percent from 2014. Harvested acreage totaled 22,400, down 2 percent from the previous season. The average yield, at 4,510 pounds per acre was down 2 percent from the previous year.

**Boysenberries:** Total 2015 United States boysenberry production is estimated at 2.46 million pounds, down 4 percent from 2014. Harvested acreage totaled 350 acres down 150 acres from the previous season. The average yield, at 7,000 pounds per acre was up 37 percent from the previous year.

**Sweet cherries:** Utilized sweet cherry production for 2015 at 336,836 tons, is down 6 percent from 2014. Six of the eight estimating States (Idaho, Michigan, Montana, Oregon, Utah, and Washington) showed decreased production from last season, while California and New York showed an increase.

Growers in Idaho, Oregon, and Washington reported a warm and relatively dry winter. A freeze event in November 2014 led to loss of trees that were not yet dormant. In the spring, rain events and above average temperature pushed maturity ahead of the normal pace and harvest earlier than normal. Utah growers reported a hard freeze that had a severe negative effect on production in much of the State. In Michigan, a hard freeze in late May 2015 had a detrimental effect on production as well. Overall, yield for the State is expected to be less than the previous year.

In California, harvest began early with shipments completed by the second week in June. Production increased from 2014's record low, but was still below 2013. In New York, growers reported a better than average crop in 2015.

**Tart cherries:** Utilized tart cherry production for 2015 is estimated at 251 million pounds, down 16 percent from 2014. Four of the seven estimating States (Michigan, Oregon, Utah, and Wisconsin) showed decreased production from last season, while New York, Pennsylvania, and Washington showed an increase.

In Michigan, the largest producing State, a hard freeze during late May 2015 significantly reduced yields. In Wisconsin, growers reported damage to trees from harsh winter weather. Several growers no longer had production due to tree mortality. Oregon and Utah growers experienced a freeze event led to loss of some trees that were not yet dormant.

In New York and Pennsylvania growers reported a crop that resulted in good production. Favorable conditions contributed to good yields. In Washington, rains and above average temperatures during spring pushed maturity and harvest ahead of the normal pace.

**Coffee:** Hawaii utilized coffee production is estimated at 34.7 million pounds (cherry basis) for the 2015-2016 season, down 5 percent from the previous season. Bearing acreage totaled 6,900, down 900 acres from the previous year. Average yield, at 5,300 pounds (cherry basis) per acre, was up 580 pounds from the previous year. Many producers reported they had to prune back their trees or cut the trees down and replant due to CBB damage.

**Cranberries:** Total 2015 United States cranberry production is estimated at 8.56 million barrels, up 2 percent from 2014. Harvested acreage totaled 40,900, up 300 acres from the previous season. The average yield, at 206.7 barrels per acre was up 2 percent from the previous year.

**Dates:** California utilized date production is estimated at 43,600 tons for the 2015 season, up 31 percent from the previous season. Bearing acreage totaled 10,000, unchanged from the previous year. Average yield, at 4.36 tons per acre, was up 1.02 tons from 2014. The large production increase was due to immature trees coming into full production.

**Fig:** California utilized fig production is estimated at 30,200 tons for the 2015 season, down 10 percent from the previous season. Bearing acreage totaled 6,800, down 200 acres from the previous year. Average yield, at 4.44 tons per acre, was down 0.33 tons from 2014. Acreage continued to be removed from production.

**Grapes:** Utilized grape production for 2015 is estimated at 7.68 million tons, down 2 percent from the revised 2014 total. The California crop, which accounted for 89 percent of the 2015 United States utilized grape production, was down 1 percent from the previous year. Bearing acreage, at 1.02 million for the 2015 season, was down 1 percent from the revised 2014 acreage. California bearing acres for the 2015 season is down 9,000 acres from the previous year. In 2015, the value of utilized production totaled \$5.56 billion, down 4 percent from the revised 2014 value of \$5.82 billion. California's 2015 utilized production was valued at \$4.95 billion, accounting for 89 percent of the overall United States value of utilized production.

**Hazelnuts:** The hazelnut crop, at 31,000 tons, is 14 percent below the previous year. Bearing acreage remained unchanged at 30,000 acres. Yield, at 1.03 tons per acre, was down 14 percent from 2014. Hazelnut utilized crop value, at 86.8 million dollars, was 33 percent below last year. Price per ton, at \$2800, declined 22 percent from 2014.

**Kiwifruit:** Utilized production in California for 2015 totaled 23,100 tons, down 17 percent from the previous year. Acreage was down 100 from the previous season to 4,000. The value of the 2015 crop was down 7 percent from the 2014 crop year to 30.9 million dollars, however the price for the 2015 season was up 150 dollars per ton to 1,340 dollars.

**Macadamia Nuts:** Macadamia nut production totalled 23,500 tons, up 2 percent from 2014. Bearing acreage remained unchanged at 16,000 acres while yield increased 2 percent from the previous year. The 2015 utilized macadamia nut crop was valued at 45.6 million dollars, up 14 percent from 2014. The price per pound of macadamia nuts was 10 cents higher than 2014.

**Nectarines:** Utilized nectarine production is estimated at 164,600 tons for the 2015 season, down 20 percent from the

previous season. Bearing acreage totaled 20,200, down 2,300 acres from the previous year. Average yield, at 8.30 tons per acre, was down 0.82 ton from the previous year.

**Olive:** California utilized olive production is estimated at 179,000 tons for the 2015 season, up 88 percent from the previous season. Bearing acreage totaled 36,000, down 1,000 acres from the previous year. Average yield, at 4.97 tons per acre, was up 2.40 tons from the previous year.

**Papaya:** Hawaii's total production for 2015, at 27.3 million pounds, was up 16 percent from 2014. Bearing acreage totaled 1,500 acres, unchanged from the previous season. Total yield for the 2015 crop, at 18,200 pounds per acre, was up 16 percent. The all price for the 2015 crop, at 41.9 cents per pound, was down 6.1 cents per pound from the previous season. Hawaii total value for the 2015 season totaled 10.6 million dollars, down 6 percent from the 2014 season.

**Peaches:** Utilized peach production for 2015 is estimated at 825,415 tons, down 2 percent from the previous year. The California crop, accounting for 73 percent of the United States utilized peach production, is down 2 percent from 2014.

In California, Freestone growers reported a fast harvest in 2015 due to dry conditions. Growers reported decreased volumes during harvest due to midseason rains but indicated that overall fruit quality was good. Clingstone full bloom occurred on schedule and growers completed spraying and pruning by the end of March. The drought situation remained a concern for growers, however many orchardists were able to offset reduced irrigation district water deliveries by utilizing wells to pump groundwater.

In South Carolina, trees received the necessary chill hours to deliver a good crop. A cold snap in late-March did some mild damage to the crop across the State. Peaches in the Upstate region were affected most by the freeze and many producers reported a total loss. Central South Carolina's crop was not affected as much by the freezing temperatures. Production was reported as steady with harvest starting in early-May, slightly behind the five-year average. Harvest was complete by the end of August. Georgia's peach crop was hindered by freezing temperatures in late-March. Harvest began the second week of May and was completed by mid-August.

In New Jersey and Pennsylvania, the crop varied by location, with freezing temperatures, wind, and drought all reported. Some growers reported a bumper crop while others reported a total loss. Michigan's bearing acreage showed a continued decline, with many trees dying from sub-zero temperatures during the last two winters.

**Pears:** Utilized pear production for 2015 is estimated at 807,130 tons, down 3 percent from the 2014 estimate. Three of the six estimating States (Michigan, Pennsylvania, and Washington) showed decreased production from last season, while California, New York, and Oregon showed an increase.

In California, harvest began in the Sacramento-San Joaquin region the first week of July. Generally fair weather was reported during harvest, although there were several very hot days. In Oregon and Washington, fruit size was smaller than expected. Cork spot was prevalent throughout the region.

In Michigan, damage caused by this year's harsh winter, along with strong storms and heavy rains, lowered pear yield and production. New York growers reported lower quality due to hail, frost, and drought. In Pennsylvania, frost lowered fruit quality and quantity.

**Pecans:** Pecan utilized production in 2015 is estimated at 254 million pounds, down 4 percent from 2014. Improved pecan production, at 225 million pounds, accounts for 89 percent of the total. The value of the 2015 utilized pecan crop increased 8 percent from the previous year to 560 million dollars. Improved pecan production again accounted for the majority of the total, increasing 8 percent from 2014, to 521 million dollars. The price per pound for all pecans, at \$2.20, was \$0.24 higher than 2014.

**Pistachios:** Pistachio utilized production, at 135,000 tons is 47 percent lower than 2014. Bearing acreage, at 233,000 acres, continued to increase from previous years. Yield, at 1,160 pounds per acre, was down 50 percent from 2014. The pistachio utilized crop value for 2015, at 670 million dollars, is down 64 percent from previous year. Price per pound declined 31 percent from 2014 to \$2.48. The majority of the crop, 76 percent, was sold in shell.

**Plums:** Total plum production for 2015 is estimated at 106,000 tons, down 6 percent from 2014. Bearing acreage totaled 17,800, down 200 acres from the previous season. Total yield for the 2015 crop was down 5 percent to 5.96 tons per acre. The all price for the 2015 crop, at \$998 per ton, was up 9 percent from the previous season. United States total value for the 2015 season totaled \$105 million, up 2 percent from the 2014 season.

**Prunes:** Total prune production for 2015 is estimated at 112,000 tons, up 4 percent from 2014. Bearing acreage totaled 47,000, down 1,000 acres from the previous season. Total yield for the 2015 crop was up 0.13 ton to 2.38 tons per acre. The all price for the 2015 crop, at \$2,010 per ton, was down 19 percent from the previous season. United States total value for the 2015 season totaled \$221 million, down 17 percent from the 2014 season.

**Prunes and Plums:** Prunes and plums utilized production for 2015 is estimated at 9,650 tons, down 33 percent from 2014. Bearing acreage totaled 2,420, down 80 acres from the previous season. Total yield for the 2015 crop was down 1.93 tons to 4.00 tons per acre. The all price for the 2015 crop, at \$553.00 per ton, was up 14 percent from the previous season. United States total value for the 2015 season totaled \$5.34 million, down 24 percent from the 2014 season.

**Raspberries:** Total 2015 United States raspberry production is estimated at 263 million pounds, up 15 percent from 2014. Harvested acreage totaled 20,320 acres, up 770 acres from the previous season. The average yield, at 12,600 pounds per acre was up 11 percent from the previous year.

**Strawberries:** Total production for 2015 is at 30.9 million cwt, up 2 percent from 2014. Harvested acres totaled 58,010 acres, down 1,885 acres from last season. Total yield for the 2015 crop is up 5 percent to 532 cwt per acre. The all price for 2015 crop at \$71.90 cents per cwt is down \$21.40 cents from the previous season. The total value of production for the 2015 season is 2.2 billion dollars down 21 percent from the 2014 season.

**Walnuts:** Walnut utilized production in 2015, at 603,000 tons, was up 6 percent from the previous year. Bearing acreage for walnuts continued to increase from previous seasons, totaling 300,000 acres in 2015. Yield, at 2.01 tons per acre, was up 2 percent from 2014. The 2015 utilized walnut crop was valued at 977 million dollars, 48 percent less than the previous year. The majority of the utilized walnut production, 69 percent, was sold shelled. Walnut prices declined 51 percent to \$1,620 per ton in 2015.

## Definition of Terms

**Bearing acreage:** An orchard, grove, or vineyard is considered to be of bearing age when it can normally be expected to produce a commercially significant quantity of the crop. Bearing age is a function of many factors including variety, rootstock, year planted, etc.

**Apple crop:** Apple production estimates are published only for commercial orchards, according to the laws governing crop production reports (7 U.S.C 411b). Commercial orchards, under these laws, are defined as orchards of 100 or more bearing trees.

**Harvested not sold:** Fruit of marketable quality that was picked but not sold for various reasons up to 2 percent of total production is considered normal seasonal loss and is excluded from total production. Reported values are above and beyond these normal seasonal losses. Beginning in 2015, all quantities harvested not sold are included in total production.

**Total production:** The quantity of a crop actually harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested because of economic or natural reasons are included in production estimates.

**Unutilized production:** The difference between total and utilized production, which is marketable fruit not harvested for economic or natural reasons and harvested fruit not sold or utilized, is unutilized production.

**Unharvested production:** Marketable fruit produced, but not harvested for various reasons, is unharvested production. Unharvested amounts up to 2 percent of total production are considered normal seasonal losses and are excluded from

total production. Published estimates of unharvested production represent quantities above and beyond these normal seasonal losses.

**Utilization:** These estimates refer to the first utilization, not necessarily the final utilization of a crop. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity. Fruit graded-out from canning or freezing and utilized for juice is included with juice.

**Utilized production:** The amount of a crop sold plus the quantities used at home or held in storage represents utilized production.

**Yield per acre:** Unless otherwise stated, yield per acre is based on total production.

## Price and Value Definitions

**Price:** Except where specified as monthly, prices in this report represent the Market Year Average (MYA) price. For a crop sold for both fresh market and processing, the total crop MYA is a weighted average of the fresh and processing prices.

Prices for fresh fruit represent the average price producers receive at the point of first sale. This is commonly referred to as the average price as sold. The exception is fresh fruit sales in California, Michigan (apples only), New York (apples only), and Washington which are equivalent returns at packinghouse door.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for cranberries, California olives, and freestone peaches, which are priced at the first delivery point.

**Value:** Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts which are based on a calendar year.

## State MYA Price and Value Computations

### Fresh Market Value:

Fresh Market MYA \* Fresh Market Utilization

### Processed Value:

Processed MYA \* Processed Utilization

### "All" Value:

Fresh Market Value + Processed Value

### "All" MYA:

"All" Value / "All" Utilization

For commodities with components not identified by market channel, substitute breakdown name for fresh market/processed and use the same procedure.

## United States MYA Price and Value Computations

### Fresh Market MYA:

$$\frac{\sum(\text{Fresh Market Value For All States})}{\sum(\text{Fresh Market Utilization For All States})}$$

**Processed MYA:**

$$\frac{\sum(\text{Processed Value For All States})}{\sum(\text{Processed Utilization For All States})}$$

**"All" MYA:**

$$\frac{\sum(\text{Value For All States})}{\sum(\text{Utilization For All States})}$$

**Marketing Seasons****Noncitrus Fruits**

**Apples:** July to May for Illinois, Indiana, Michigan and Ohio; August to December for Arizona, Iowa, Minnesota, Missouri, New Jersey, Tennessee and Wisconsin; August to June for all other states.

**Apricots:** May 15 to July 5 for California; June 10 to August 15 for Utah; June 20 to August 1 for Washington.

**Avocados:** November 1 to October for California; June 20 to March 1 for Florida; January 1 to December 31 for Hawaii.

**Bananas:** January 1 to December 31

**Blackberries:** June to October

**Blueberries, Cultivated:** March to October

**Blueberries, Wild:** July to September

**Boysenberries:** July to August

**Raspberries:** May through November

**Cherries, sweet:** April 25 to June 15 for California; July 20 to August 20 for Montana; June to July for all other States.

**Cherries, tart:** June 25 to August 15

**Cranberries:** September to January

**Dates:** August 15 to March 15

**Figs:** June 5 to October 30

**Grapes:** May 25 to July for Table (California); June 5 to July 31 for Raisin (California); August 15 to December 15 for Wine (California and Washington); September 15 to November 1 for Juice (Washington); July to October for all other States.

**Guavas:** January 1 to December 31

**Kiwifruit:** October 1 to May 31

**Nectarines:** April 30 to October 15

**Olives:** August 1 to July 31

**Papayas:** January 1 to December 31

**Peaches:** July 10 to September 15 for Clingstone (California); April 20 to October 10 for Freestone (California); May to August for Georgia and South Carolina; July to September for all other States.

**Pears:** July to December for Bartlett (California, Oregon, and Washington); July to June for other (California, Oregon, and Washington); August to November for all other States.

**Plums:** May 15 to October 20 for California

**Prunes, dried:** August 20 to April 15 for California

**Prunes and plums:** August 15 to October 15

**Strawberries:** September 15 to December 31 for California; December 15 to May 15 for Florida; April 10 to June 15 for North Carolina; May 30 to July 15 for Pennsylvania and Wisconsin; June to July for all other States.

## **Tree Nuts**

**Almonds:** August 5 to November 15

**Hazelnuts:** October 1 to November 30

**Macadamia nuts:** July 1 to June 30

**Pecans:** October 1 to March 31

**Pistachios:** September 30 to January 30

**Walnuts:** September 15 to November 10

For detail by States, see Agricultural Handbook No. 729, *Fruits and Tree Nuts: Blooming, Harvesting, and Marketing Dates, December 2006*.

## Statistical Methodology

**Survey Procedures:** Non-probability monthly grower surveys are used to collect crop condition, yield, acreage, and production data. These fruit inquiries are generally mailed surveys during the growing season. Telephone follow-up of mail survey non-respondents is used to ensure adequate coverage. Special grower disposition surveys are conducted at the end of each season to provide additional details about the crop. They provide indications of the quantity used on farms, the quantity sold directly to consumers, unharvested production, and production not sold or utilized. All fruit and nut processors or shellers are also surveyed annually to determine quantity handle, utilization, and the origin of the commodity.

**Estimating Procedures:** Information obtained from the non-citrus fruits and nuts grower surveys along with federal administrative data is used to establish estimates of bearing acres, yield, total production, utilized production, price, and value. These estimates are reviewed for errors, reasonableness, and consistency with historical estimates.

**Revision Policy:** Final survey indications and check data for most non-citrus fruits and nuts are available prior to submitting utilization estimates. As a result revisions are allowed for a few crops in the spring. End-of-season estimates of production are made following harvest and are subject to revision the following year based on a thorough review of all available data.

**Reliability:** To assist users in evaluating the reliability of the July noncitrus fruit total production estimates, the "Root Mean Square Error," a statistical measure based on past performance, is computed. The deviation between the first July total production estimate and the final estimate is expressed as a percentage of the final estimate. The average of squared percentage deviations for the latest 20-year period is computed. The square root of the average becomes statistically the "Root Mean Square Error." Probability statements can be made concerning expected differences in the current estimate relative to the final end-of-season estimate, assuming that factors affecting this year's estimate are not different from those influencing recent years. For example, the "Root Mean Square Error" for the July apple total production estimate is 1.4 percent. This means that chances are 2 out of 3 that the current production estimate will not be above or below the final estimate by more than 1.4 percent. Chances are 9 out of 10 (90 percent confidence level) that the difference will not exceed 2.4 percent.

The following table is included with a 19-year record for selected crops of the differences between the first July total production estimate and the final estimate. Using apples again as an example, changes between the first July estimate and the final estimate during the last 19 years have averaged 51.1 thousand tons, ranging from less than half of a thousand tons to 191.4 thousand tons. The first July estimate has been below the final estimate 6 times and above 13 times. This does not imply that the July estimate this year is likely to understate or overstate the final production.

### Reliability of Selected Noncitrus Fruit Estimates

[Comparisons for 2012 have been excluded]

Crop	Root mean square error		20-year record of differences between initial estimate and final estimate					
	Percent	90 percent confidence interval	Quantity			Years		
			Average	Smallest	Largest	Below final	Above final	
Apples ..... tons	1.4	2.4	(1,000)	(1,000)	(1,000)	(number)	(number)	
Grapes ..... tons	0.6	1.0	51.1	0.7	191.4	6	13	
Peaches ..... tons	1.0	1.7	31.6	5.4	112.0	12	7	
Pears ..... tons	1.4	2.5	7.4	0	25.1	6	12	
			8.5	0	35.0	7	6	

## Information Contacts

Listed below are the commodity statisticians in the Crops Branch of the National Agricultural Statistics Service to contact for additional information. E-mail inquiries may be sent to nass@nass.usda.gov

Lance Honig, Chief, Crops Branch ..... (202) 720-2127

Jorge Garcia-Pratts, Head, Fruits, Vegetables and Special Crops Section ..... (202) 720-2127

Vincent Davis – Fresh and Processing Vegetables, Onions, Strawberries,

Sugarbeets, Sugarcane, Cherries ..... (202) 720-2157

Fleming Gibson – Citrus, Coffee, Tropical Fruits ..... (202) 720-5412

Greg Lemmons – Berries, Cranberries, Potatoes, Sweet Potatoes ..... (202) 720-4285

Dave Losh – Hops ..... (360) 709-2400

Dan Norris – Austrian Winter Peas, Dry Edible Peas, Lentils, Mint,

Mushrooms, Peaches, Pears, Wrinkled Seed Peas, Dry Beans ..... (202) 720-3250

Daphne Schauber – Floriculture, Grapes, Maple Syrup, Nursery, Tree Nuts ..... (202) 720-4215

Chris Singh – Apples, Apricots, Plums, Prunes, Tobacco ..... (202) 720-4288

## **Access to NASS Reports**

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: [www.nass.usda.gov](http://www.nass.usda.gov)
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit [www.nass.usda.gov](http://www.nass.usda.gov) and click on “National” or “State” in upper right corner above “search” box to create an account and select the reports you would like to receive.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: [nass@nass.usda.gov](mailto:nass@nass.usda.gov).

The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.)

If you wish to file a Civil Rights program complaint of discrimination, complete the [USDA Program Discrimination Complaint Form](#) (PDF), found online at [http://www.ascr.usda.gov/complaint\\_filing\\_cust.html](http://www.ascr.usda.gov/complaint_filing_cust.html), or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter to us by mail at U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at [program.intake@usda.gov](mailto:program.intake@usda.gov).
